About US

Chayaputhra Services is a progressive enterprise distinguished by its expertise in designing and engineering high-performance HVAC, electrical, and electronic control panels. Our proficiency extends to advanced PLC programming, BMS and BAS integration, and electrical retrofit solutions, meticulously engineered to enhance efficiency and operational intelligence. We also provide comprehensive annual maintenance services, ensuring sustained reliability, safety, and peak system performance across all installations.

Our Values

Integrity

Integrity is the foundation of our business. We conduct our operations with honesty, transparency, and ethical principles. Our commitment to integrity ensures that we build trust with our clients, partners, and the communities we serve, fostering a positive and sustainable future for all.

Excellence

Excellence is not a singular achievement but a continuous journey of growth and self-improvement. It is the relentless pursuit of bettering oneself, pushing boundaries, and striving for the highest standards in every endeavor. Excellence demands dedication, passion, and a commitment to learning from both successes and failures. It is an attitude, a way of life that permeates every action and decision. Those who seek excellence understand that it is not about being perfect but about consistently aiming to reach one's full potential. It is a mindset that inspires others, fosters innovation, and creates a ripple effect of positive change in the world.

Collaboration

Collaboration is the cornerstone of innovation and the driving force behind progress, a catalyst that propels humanity toward a brighter future. It is the spark that ignites new ideas and transforms them into tangible realities, reshaping industries and improving lives. From the earliest inventions like the wheel to modern marvels such as artificial intelligence and renewable energy, innovation has always been at the heart of human advancement. In today's fast-paced world, innovation is more important than ever. It enables companies to stay competitive, helps solve complex global challenges, and creates opportunities for economic growth. Moreover, innovation is not limited to the realm of technology. It can also be found in the arts, education, healthcare, and social initiatives. It fosters a culture of continuous improvement and encourages a mindset that embraces change and values diversity of thought. By nurturing innovation, we can build a more sustainable, equitable, and prosperous world for future generations.

Innovation

Vision

Vision is a powerful gift that allows us to perceive the world in all its vibrant colors and intricate details. It guides us through our daily lives, helping us navigate and understand our surroundings. Beyond the physical, vision also embodies our dreams and aspirations, lighting the path towards our goals and ambitions. It is the spark that ignites creativity, driving innovation and inspiring change. To have vision is to see not just what is, but what could be, and to have the courage to pursue it, no matter the obstacles.

Our CoreBasket Services

- 1 Controlpanel forHVAC, Electrical, and Electronics systems.
- 2 Expert in BMS and EMS Operations
- 3 The Care and Upkeep of Electrical AC & R Apparatus.
- 4 A wondrous Electrical Retrofit endeavor.
- 5 Specialised in PLC Programming

Products

- HVAC Control Panel
- Basement Ventilation Panel
- DDC Control Panel
- MCC /VFD control Panel
- Auto Sequential Panel
- PLC Panel
- DB/Junction and Push button station
- Fire Damper Panel

BMS and EMS Operations

We deliver advanced BMS (Building Management Systems) and EMS (Energy Management Systems) that ensure intelligent, efficient, and reliable building operations. Our BMS automates HVAC, lighting, and security to optimize energy use, enhance comfort, and reduce costs.

Through real-time data analytics, our EMS solutions monitor and optimize performance, driving sustainability energy and operational excellence. By integrating IoT and machine learning, we create smarter, greener, and more energy-efficient buildings for a sustainable future.

Management

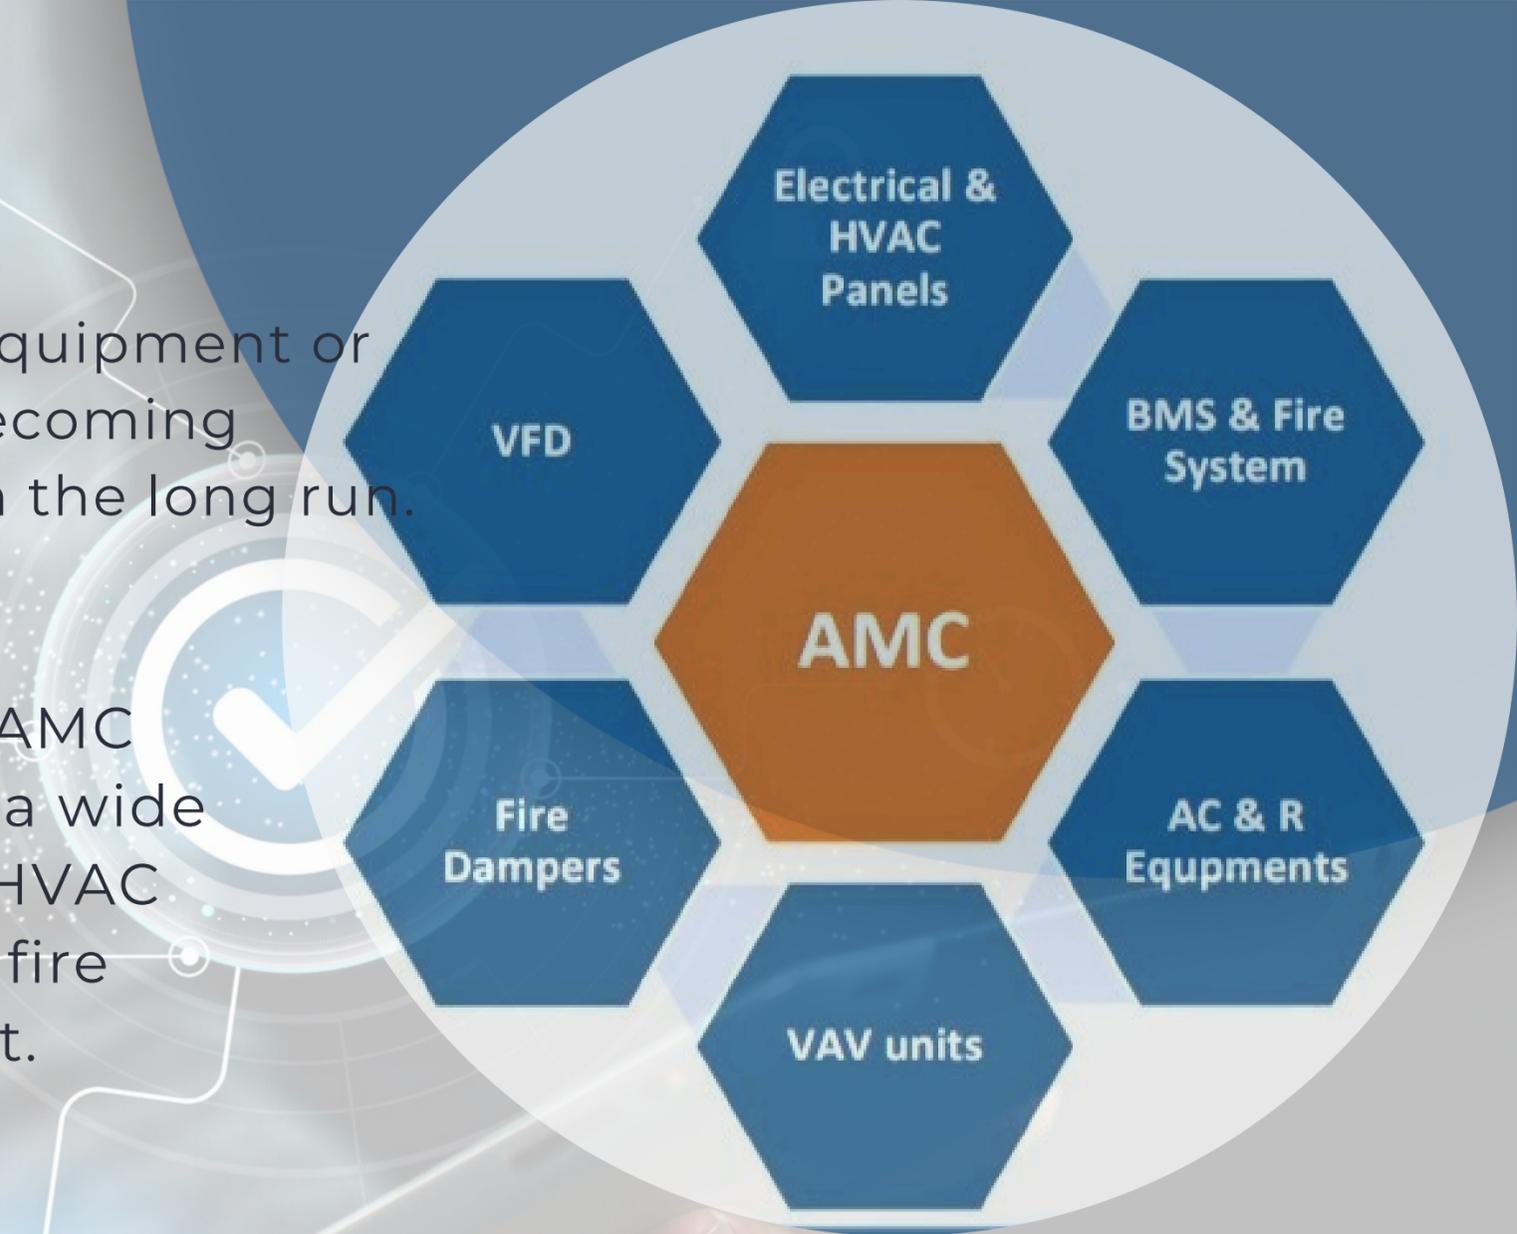

Annual Maintenance

is essential to ensure the longevity and efficiency of your equipment or property. Regular upkeep can prevent small issues from becoming significant problems, saving you time, money, and stress in the long run.

Here are some key aspects to consider:

We provide AMC (Annual Maintenance Contract), CAMC (Comprehensive Annual Maintenance Contract), and NCAMC (Non-Comprehensive Annual Maintenance Contract) for a wide range of critical systems, including VFDs, electrical and HVAC systems, BMS panels, fire protection systems, VAV units, fire dampers, and air-conditioning & refrigeration equipment.

Through these contracts, we ensure optimized system performance, enhanced safety, prolonged equipment life, and minimal downtime, delivering a tailored maintenance solution to meet diverse client requirements.

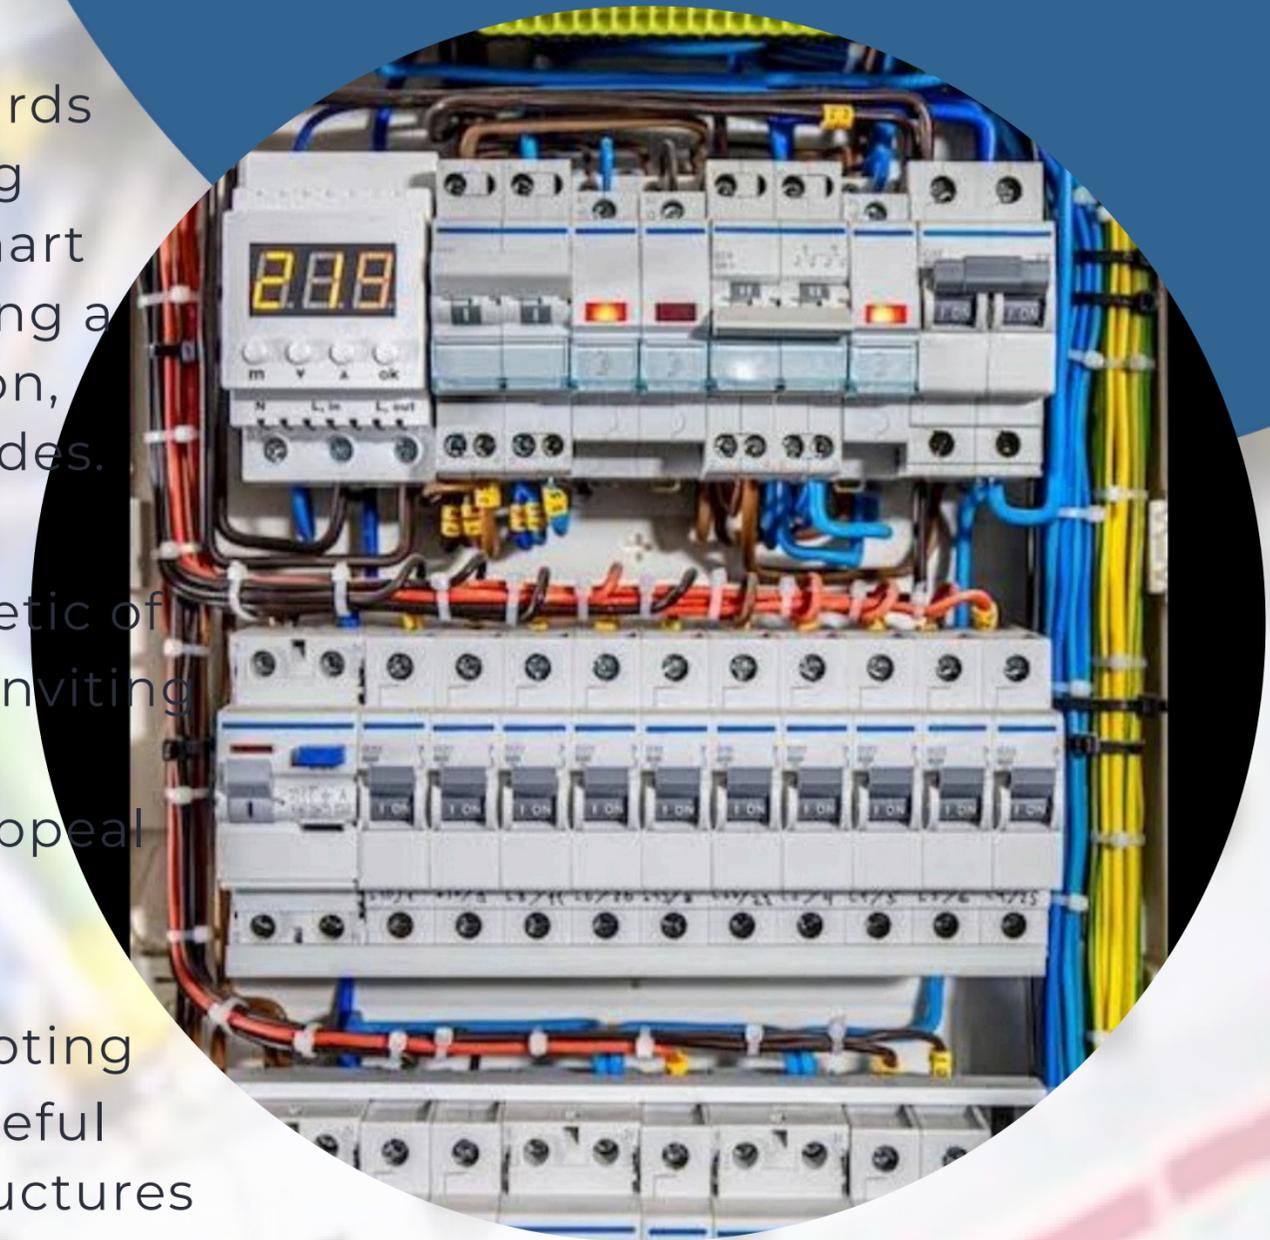

Electrical Retrofit

projects are vital for updating older buildings to meet current standards and improve energy efficiency. These projects often involve replacing outdated wiring, installing new lighting systems, and integrating smart technologies to enhance both safety and functionality. By undertaking a retrofit, building owners can significantly reduce energy consumption, lower utility costs, and ensure compliance with modern electrical codes.

In many cases, electrical retrofits can also enhance the overall aesthetic of a building. Modern lighting solutions, for instance, can create more inviting and flexible spaces, whether in residential, commercial, or industrial settings. Moreover, these projects can increase property value and appeal to environmentally conscious tenants or buyers.

Ultimately, an electrical retrofit is an investment in the future, promoting both environmental responsibility and economic efficiency. With careful planning and execution, these projects can transform aging infrastructures into modern, sustainable, and efficient spaces.

Advanced PLC Programming

We specialise in customized PLC programming, precisely aligned with specific control logic requirements, using Schneider and Selec PLC platforms. Our solutions deliver robust, high-precision automation tailored to client needs.

Key highlights include:

Tailored Logic Development for exact process requirements.

Seamless Integration with HMI, BMS, and other systems.

Optimized Performance to enhance efficiency and minimize downtime.

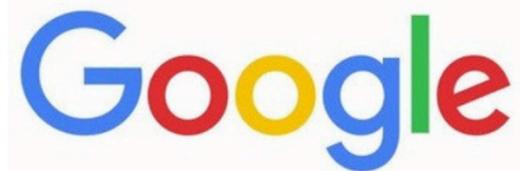

Testing & Commissioning to ensure reliable, fault-free operation.

Upgrades & Retrofits to modernize legacy systems and meet current standards.

Our PLC solutions ensure maximum reliability, operational intelligence, and system longevity.
